The smartest PV-mounting solution for trapezoidal and corrugated metal sheet

The MetaSole range sets new standards for the installation of PV-systems on metal sheet roofs. Benefit from this extreme compact, simple and quick to install system. Due to the low volume, few components and a reduction to the absolute minimum you surely will profit from its impressive overall price-performance ratio.

## Yes that's all

- Short rails to avoid temperature dilation
- 3 components for all trapezoidal metal sheets
- For all PV panel heights

## Quick and easy

- Below 10 minutes per kWp
- Pre attachment solution
- No pre-drilling

## Multi talented

- For aluminum and steel sheet
- For trapezoidal and corrugated metal sheet
- Landscape or portrait orientation

## Minimized to the maximum

- Efficiently packed for best handling on site
- Ready for installation
- 5 kWp in one shoe box
